

[22/07, 20:34] Kailash: Here is a complete, structured ****Annexure Document**** that captures all the additions, expansions, and game rule patches we have introduced together during our session. You can drop this directly into your game design document or master file.

📖 ANNEXURE: EXPANSION & SYSTEM AMENDMENTS

****Document Type:**** Modular Game Rules Annexure

****Core Game Engine:**** *TAMILAKAM: The Crown of the Three Kings*

****Subject:**** Integration of Velir Chieftain Factions, Padai Patru Mechanics, and Commercial Disruption Protocols

SECTION 1: THE VELIR CHIEFTAIN FACTIONS (*3-PLAYER EXPANSION*)

Three independent Highland Chieftain (*Velir*) factions are introduced to compete against the three Crown Monarchs (*Muvendhar*—Chola, Pandya, Chera). Velir factions begin in inland hill/pastoral hubs (*Kurinji/Mullai*) and operate on unique economic and military parameters.

1.1 Faction Profiles

1. ****THE MALAIYAMAN FACTION**** *(Tirukkivilur Hub / Pennai River Corridor)*
 - * ****Role:**** Inland Chokepoint & Cavalry Vanguard.
 - * ****Trait (*Pennai Chokepoint*):**** Pays -1 Gold when constructing *Padai Patru* military encampments along river or hill corridor hexes.
2. ****THE IRUNGOLAR FACTION**** *(Ko Nadu / Central Hill Domain)*
 - * ****Role:**** Highland Fortress Master & Ancient Clan Lineage.
 - * ****Trait (*Dvaraka Descent*):**** Starts the game with +2 Centamil Prestige and gains +2 Defense Points (DP) when defending inside *Kurinji* or hill tiles.
3. ****THE VANAR FACTION**** *(Vannipadam Forest / Border Marches)*
 - * ****Role:**** Outlaw Ally & Frontier Raider.
 - * ****Trait (*Forest Encroachment*):**** Can establish friendly Raiding Dens on un-reclaimed *Palai* hexes without flipping them into state-controlled Palai Forts.

SECTION 2: THE VELIR WIN CONDITION (*PADAI PATRU MECHANIC*)

Unlike Crown Monarchs who seek territorial state-building, agricultural irrigation, or cultural monumentality, Velir players win by asserting hereditary military tenure (*Padai Patru*) inside Crown heartlands.

2.1 Victory Trigger: Padai Patru Enclave

A Velir player instantly wins the game if they successfully establish a ****Padai Patru Enclave**** within ****2 Hexes** of any rival Crown Monarch's Capital******.

2.2 Execution Requirements

To form a Padai Patru Enclave, the Velir player must satisfy the following criteria:

1. ****Positioning:**** Position 1 Velir Commander/Chief and at least 2 Velir Tribal Warriors on an un-flipped (Side A) hex located within 2 hex spaces of a Crown Capital.
2. ****Extortion or Triumph:**** Spend ****4 Gold + 2 Rice**** OR defeat a Crown Army on that specific tile in Phase 3 combat.
3. ****The Lock:**** Flip the tile to a ****Padai Patru Enclave (Velir Side B)****.

2.3 Tile Immunities & Crown Penalties

* ****Irreversible Protection:**** A Padai Patru Enclave *cannot* be converted by a Crown King into a *Devadana* (Sacred Estate) or *Nagaram* (Market Node).

* ****Tax Paralysis:**** The Enclave automatically stops adjacent enemy farms from paying tax to the Crown during Phase 1 (Harvest Phase).

SECTION 3: VELIR COMMERCIAL RULES & GUILD DESTRUCTION

Velir factions reject Crown-backed Agamic market institutions and operate through direct raw-resource barter.

3.1 Construction Restriction

* **No Nagaram Construction:** Velir players are strictly prohibited from executing Major Action [E] Found Nagaram. They cannot build formal guild markets or earn passive +2 Gold yield from Nagaram nodes.

3.2 The Guild Purge (*Sathan / Ma Sathuvan Elimination*)

Velir forces can actively dismantle Crown trade routes:

* **Purge Execution:** Moving a Velir force into a Crown-controlled Side B Nagaram tile allows the Velir player to eliminate any *Sathan* agent on-site.

* **Single-Flip Exception:** Executing a Guild Purge is the *only mechanism in the game* that forces a Side B Nagaram tile to **revert back to a Side A raw landscape**.

* **Global Impact:** Reverting a Nagaram strips the owning Crown player of their market yield and disrupts their progress toward the *Ma Sathuvan* Commercial Metric Title.

3.3 Direct Highland-Coastal Barter

* **Raw Hill Goods:** Velir domains generate unique high-value resources (*Hill Honey/Spices* from Kurinji, *Timber/Elephants* from Mullai).

* **Direct Selling Rule:** A Velir unit can move directly onto any active Nagaram node (even one owned by a rival Crown player) and sell raw hill goods at a **1-to-1 conversion rate** (1 Resource $\rightarrow$ 1 Gold Coin) directly into their vault.

* **Middleman Bypass:** This transaction requires no *Sathan* agent and pays zero market tax to the Crown tile holder.

SECTION 4: REVISED STRATEGIC ACTION MATRIX (VELIR OPTIONS)

During Phase 2 (Strategic Action Phase), Velir players select **2 Major Actions** from their own dedicated action set:

| Action Code | Action Name | Requirements / Cost | Result / Yield |

|---|---|---|---|

| **[V-A]** | **Mobilize Clan Tribes** | Pay 1 Rice + 1 Tribal Labor | Recruit 2 Velir Tribal Warriors on any friendly Kurinji/Mullai hex. |

| **[V-B]** | **Demand Border Tribute** | Station unit adjacent to Crown farm | Steal 1 Gold or 1 Rice from an un-protected Crown farm. |

| **[V-C]** | **Execute Guild Purge** | Occupy enemy Nagaram node | Eliminate Sathan agent, strip Ma Sathuvan bonus, and revert Nagaram to Side A. |

| **[V-D]** | **Padai Patru Push** | 4 Gold + 2 Rice (or Combat Win) within 2 hexes of Capital | Flip tile to Padai Patru Enclave (**Triggers Instant Victory**). |

| **[V-E]** | **Direct Barter Trade** | Move Velir unit to active Nagaram | Convert up to 4 raw hill goods directly into Gold Coins at 1:1 rate. |

SECTION 5: MASTER SYSTEM BALANCE SUMMARY

...

	ASYMMETRIC CORE BALANCE	
--	-------------------------	--

THE CROWN MONARCHS (Chola, Pandya, Chera)	
• Strength: High delta yield, irrigation scaling, global guild	
tax (span_27)(start_span)(span_27)(end_span) .	
• Vulnerability: Dependent on Sathans; vulnerable to Padai Patru near	
capital (span_28)(start_span)(span_28)(end_span) .	
THE VELIR CHIEFTAINS (Malaiyaman, Irungolar, Vanar)	
• Strength: Upland defensive buffs, direct barter, market	
destruction (span_29)(start_span)(span_29)(end_span) .	
• Vulnerability: No native Nagaram gold generation; limited state	
tax (span_30)(start_span)(span_30)(end_span) .	

...

[22/07, 20:40] Kailash: Here is the continuation of your ****Annexure Document****, picking up directly from where the previous annexure section left off. You can append this directly to your master file to complete the game's expansion rules.

📖 ANNEXURE: EXPANSION & SYSTEM AMENDMENT (PART II)

****Document Type:**** Modular Game Rules Annexure (Continuation)

****Core Game Engine:**** *TAMILAKAM: The Crown of the Three Kings*

****Subject:**** Valangai Military Supply Dependencies, Devadana Kshatriya Elevation, Matrimonial Alliances, and Mercenary Contracting

SECTION 6: SATHUVAN DISRUPTION & VALANGAI MILITARY DEPENDENCY

This amendment simulates the historical reliance of Crown Monarchs (*Muvendhar*) on trade guild networks (*Sathuvans*) to maintain their standing Right-Hand (*Valangai*) military forces, and the resulting shift to Velir supply dependency when trade breaks down.

6.1 Sathuvan Influence & Supply Capacity

* ****Supply Ratio:**** Every active *Sathan* agent or operational *Nagaram* node under a Crown player's control provides ****1 Valangai Supply Point****.

* ****Supply Deficit Trigger:**** If a Velir player executes a Guild Purge or eliminates a *Sathan* agent, and the Crown player's total standing military units exceed their remaining Valangai Supply Points:

* ****Upkeep Cost Increase:**** During Phase 1 (Harvest Phase), the Crown player must pay an additional ****+1 Rice** per un-supplied unit** to maintain their standing *Vettuva Maravar* infantry.

* ****Desertion Penalty:**** Any un-supplied unit whose upkeep cannot be paid is immediately removed from the board due to starvation/desertion.

6.2 Emergency Velir Provisioning Contracts

When facing a supply deficit, a Crown Monarch can execute an ****Emergency Provisioning Action**** during Phase 2 (Strategic Action Phase):

* ****Trade Terms:**** The Crown player buys grain and livestock directly from an adjacent Velir player's *Kurinji/Mullai* domain.

* **Payment:** The Crown must transfer **2 Gold** OR **2 Centamil Prestige Points** directly to the Velir player per supply token requested.

* **The Padai Patru Tolerance Clause:** As part of the contract, the Velir player may demand a **Padai Patru Tolerance Pact**—forcing the Crown player to sign a non-aggression agreement that prohibits attacking or dismantling any Velir military encampment for **2 full turn cycles**.

SECTION 7: VELIR KSHATRIYA ELEVATION & SOCIAL PRESTIGE

Velir chieftains can transcend their regional tribal status by patronizing sacred land grants (*Devadana*), earning Agamic legitimization, and claiming the title of **Kshatriya Nobility**.

7.1 Devadana Patronage Protocol

* **Action:** Spend **3 Gold + 1 Rice** on an un-flipped (Side A) *Marudham* or *Kurinji* tile.

* **Transformation:** Flip the tile to a **Velir Devadana Estate (Side B)**.

* **Track Modifiers:** Instantly advances the Velir player **+2 steps

 on the Sanskritization Track**.

7.2 The Kshatriya Title

* **Unlocking Threshold:** Reaching **Level 6 on the Sanskritization Track** grants the Velir lord the **Kshatriya Title**.

* **Title Perks:**

1. **Diplomatic Access:** Unlocks the ability to propose and form binding **Matrimonial Alliances**.
2. **Kinship Immunity:** Protects the Velir player's core highland domains from being targeted by Crown *Kinship Interventions*.
3. **Territorial Defense:** All units stationed on a Velir Devadana Estate gain a permanent **+1 Defense Point (DP) bonus**.

SECTION 8: DYNASTIC MATRIMONIAL ALLIANCES

Velir houses with Kshatriya status can form dynastic marriage blocs with other Velir factions or Crown Monarchs to alter political and military dynamics.

8.1 Alliance Formation Requirements

* **Prerequisite:** At least one participating faction must hold the **Kshatriya Title** (or be an active Crown Monarch).

* **Cost:** Both agreeing players must spend **2 Centamil Prestige Points**.

8.2 Gameplay Modifiers

1. **Non-Aggression Pact:** Allied factions cannot enter each other's tiles, purge each other's trade nodes, or execute raids against each other for **3 full turn cycles**.
2. **Shared Defensive Shield:** Friendly units stationed inside an ally's *Padai Patru* or Fort grant a joint **+2 DP multiplier** during defense resolution.
3. **Joint Victory Condition:** Two allied Velir players achieve a **Joint Hegemony Victory** if *either* player successfully establishes a *Padai Patru Enclave* within 2 hexes of a rival Crown Capital.

SECTION 9: MERCENARY WARFARE CONTRACTS (*PADAI MILITARY RENTALS*)

Velir factions can monetize their military strength by renting out elite highland troops to other players facing military or economic stress.

9.1 Renting Mechanics

* **Action:** During Phase 2, a Velir player may contract out up to **2 Velir Tribal Warriors or Cavalry units** to any player.

* **Contract Fee Options:** The hiring player must pay the Velir owner every turn during Phase 1:

* **Option A:** Pay **2 Gold per unit** directly into the Velir Vault.

* **Option B:** Pay **2 Rice per unit** to maintain the Velir troops.

9.2 Battlefield Command & Mercenary Revolts

* **Command:** Rented troops fight under the hiring player's command for movement and combat resolution in Phase 3.

* **The Mercenary Revolt:** If the hiring player fails to pay the required fee during Phase 1 (Harvest Phase):

* The rented units instantly revolt, becoming hostile to the host.

* The revolting units steal **1 Gold or 1 Rice** from the host's vault and immediately revert to the control of their original Velir owner.

SECTION 10: COMPLETE EXPANSION ACTION REFERENCE (VELIR REVISED)

This master matrix updates the full suite of Major Actions available to Velir players during Phase 2:

| Action Code | Action Name | Requirements / Cost | Result / Rules Impact |

|---|---|---|---|

| **[V-A]** | **Mobilize Clan Tribes** | 1 Rice + 1 Tribal Labor | Recruit 2 Velir Tribal Warriors on a friendly *Kurinji/Mullai* hex. |

| **[V-B]** | **Demand Border Tribute** | Unit adjacent to Crown farm | Steal 1 Gold or 1 Rice from an un-protected Crown farm. |

| **[V-C]** | **Execute Guild Purge** | Occupy enemy Nagaram node | Eliminate *Sathan*, break Valangai supply, and revert tile to Side A. |

| **[V-D]** | **Padai Patru Push** | 4 Gold + 2 Rice (or Combat Win) within 2 hexes of Capital | Flip tile to Padai Patru Enclave (**Triggers Instant Victory**). |

| **[V-E]** | **Direct Barter Trade** | Unit on active Nagaram | Convert up to 4 raw hill goods directly into Gold Coins at a 1:1 rate. |

| **[V-F]** | **Endow Devadana** | 3 Gold + 1 Rice | Flip tile to Velir Devadana Estate (+2 Sanskritization; path to Kshatriya). |

| **[V-G]** | **Contract Mercenaries** | Rent out up to 2 units | Earn 2 Gold or 2 Rice per unit/turn from the hiring player. |

| **[V-H]** | **Matrimonial Alliance** | Kshatriya status + 2 Prestige | Enforce 3-turn non-aggression, shared DP, and joint Padai Patru victory. |

[22/07, 20:47] Kailash: This is a perfect historical correction. In Sangam literature, the *Kurinji* (mountains) and *Mullai* (forests/pastures) regions did not rely on wet-rice agriculture. Their wealth came from **millet (*Thinai*) farming**, **cattle rearing (pastoralism)**, and harvesting **rare hill goods** (honey, ivory, pepper, and timber).

By implementing this, we completely solve **Gap #2 (Velir Rice Dependency)** without needing to print a brand new type of token. We simply recontextualize how the Velirs use the existing game pieces.

Here is how we integrate Millet, Pastoralism, and Rare Resources into the Velir economy seamlessly:

🌾 1. The Millet & Pastoral Subsistence Rule

To avoid component bloat (adding 15 new "Millet" tokens to the box), the physical "Rice" tokens simply represent **Millet & Livestock** when placed in a Velir player's vault.

The Fix: During Phase 1 (Harvest Phase), Velir players collect **1 Millet/Livestock Token (Rice Token)** for every un-flipped (Side A) **Kurinji** or **Mullai** hex they currently control.

The Result: The Velir factions now have a native, self-sustaining dryland economy. They don't *need* to beg the Crown for lowland wet-rice just to survive or feed their troops, allowing them to remain stubbornly independent.

🐄 2. Upland Pastoralism & Cattle Wealth

Since pastoralism relies on herds, Velir wealth is mobile—which makes it highly resilient but also a prime target for Crown retaliation.

The Fix: When a Velir player uses the **Demand Border Tribute** action (or successfully executes a **Vetchi** cattle raid), they aren't just stealing generic supplies; they are expanding their herds.

The Mechanic: Velir players can spend 2 Millet/Livestock tokens to instantly recruit 1 **Maanaakkan Cavalry** (representing mounted pastoral warriors) or **Velir Tribal Warrior** directly onto a **Mullai** (pasture) tile, entirely bypassing the need for Gold.

🍯 3. Rare Resource Gathering (The Barter Engine)

We previously established that Velirs can bypass **Sathans** to sell unique goods directly at **Nagarams**. Now we need a way for them to actually harvest those goods.

The Fix - New Free Action: Once per turn, a Velir player can declare a **Highland Harvest**. They generate **1 Rare Resource Token** (representing ivory, pepper, or honey) for every Velir unit stationed on a **Kurinji** (mountain) tile.

The Barter Loop: They hold these Rare Resources in their vault. During Phase 3 (Movement), if they march that unit to any active **Nagaram** on the board, they instantly trade those goods for Gold at a 1:1 ratio, draining wealth from the Crown's infrastructure.

⚖️ How This Balances the Game

The Crown Monarchs have a **vertical economy**: they build irrigation to make a few delta tiles hyper-productive.

The Velir Chieftains now have a **horizontal/mobile economy**: they rely on widespread millet farming, cattle raiding, and carrying high-value rare goods down from the hills to sell at market. This makes the Velirs feel completely distinct to play, perfectly capturing their historical identity! Now that the Velir economy is self-sustaining and historically accurate, how do you want to handle **Gap #5**: If a Velir player builds a **Padai Patru** military encampment near a Crown Capital to choke their taxes, should the Crown player have a way to militarily besiege and destroy it?

[22/07, 20:52] Kailash: This creeping, inevitable military scaling is exactly the kind of tension that makes asymmetric games legendary!

What you are describing is the perfect mid-to-late game narrative: The Crown Monarchs start out rich and comfortable in their deltas, building markets and temples. But as the turns progress, the Velir Chieftains quietly build their herds, trade rare goods, amass tribal armies, and slowly march down from the hills, tightening a military noose around the Crown Capitals.

Because the Velirs scale so aggressively toward the late game, **we must give the Crown a way to violently push back when the Velirs reach the capital gates** (solving Gap #5). The Crown cannot just sit there and let their taxes be choked.

Here is how the Crown fights back against the Velir encirclement:

🐘 1. The Imperial Siege (Breaking the *Padai Patru*)

While a *Padai Patru* (Military Enclave) is immune to bureaucratic tricks or cultural conversion, it is ****not immune to brute force****.

****The Mechanic:**** During Phase 3 (Combat), a Crown player can launch an ****Imperial Siege**** against a Velir *Padai Patru* tile.

****The Siege Breaker Requirement:**** Because the *Padai Patru* is a heavily fortified encampment (granting a 2x DP multiplier to defenders), the Crown player will almost certainly need to deploy ****War Elephants (*Kaliru*)**** to strip away the defense aura.

****The Result of Victory:**** If the Crown player's Attack Points (AP) beat the Velir's Defense Points (DP), the Velir army is routed. The Crown player then ****liquidates the Enclave****, forcibly flipping the tile ****back to Side A (Raw Landscape)****.

****The Spoils:**** The Crown immediately reclaims the land for the state and pillages 2 Millet/Livestock or Rare Resources from the Velir's vault to feed their own troops.

⚖️ 2. Divide and Conquer (Crown Political Warfare)

If a Velir army is getting too massive for the Crown to defeat in open combat, the Crown must use their immense wealth and prestige to pit the highland clans against each other.

****The Mechanic (*Crown Kinship Intervention Update*):**** If a Crown player holds the ****Muvendha Araiyan**** title, they can spend 2 Rice/Gold to formally sponsor a rival Velir faction.

****The Proxy War:**** The Crown pays this bribe to a second Velir player. In exchange, that second Velir player is obligated to immediately execute a free ****Velir Move & Attack**** against the encroaching Velir player's forces. The Crown uses their deep pockets to make the Velirs bleed each other out before they reach the delta!

⏳ The Grand Strategic Arc (How the Game Actually Feels)

With these final pieces in place, the pacing of your game forms a beautiful, terrifying timer for both sides:

****Early Game:**** The Crown is dominating. They have high-yield farms, shiny new *Nagarams*, and lots of Gold. The Velirs are poor, hiding in the hills, scraping by on millet, and trying not to get converted into Crown bureaucrats.

****Mid Game:**** The Velirs
